DETAILED ACTION

1. It is noted that in light of the cancellation of pending claims 1-7 and 10-16 in the amendment filed 11/20/03, the restriction requirement as set forth in paragraphs 1-5 of the office action mailed 8/28/03 is rendered moot, and is thus, withdrawn.

The new grounds of rejection as set forth below are necessitated by applicants' amendment and thus, the following action is final.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 9 has been amended to recite "the blends of polyester resins being void of any cross-linking agent". The cited phraseology clearly signifies a "negative" or "exclusionary" limitation for which the applicants have no support in the original disclosure. Negative limitations in a claim which do not appear in the specification as filed introduce new concepts and violate the description requirement of 35 USC 112, first paragraph, *Ex Parte Grasselli, Suresh, and Miller*, 231 USPQ 393, 394 (Bd. Pat. App. and Inter. 1983); 783 F. 2d 453.

Art Unit: 1714

Applicants have not pointed to any support for the recitation of the cited phrase and examiner has found no support for such phrase in the specification as originally filed.

The insertion of the above phraseology as described above positively excludes the use of cross-linking agent, however, there is no support in the present specification for such exclusion. While the present specification is silent with respect to the use of cross-linking agent, is noted that as stated in MPEP 2173.05(i), the "mere absence of a positive recitation is not the basis for an exclusion."

3. **NOTE:** If applicants were to remove the phrase "the blends of polyester resins being void of any cross-linking agent" in claim 9 in response to examiner's rejection as set forth in paragraph 2 above, the 103 rejection as set forth in paragraph 8 of the office action mailed 8/28/03, i.e. Geurtsen et al. (U.S. 6,537,651) in view of Benitez (U.S. 4,321,185), would again be utilized against claim 9.

Applicants argue that Geurtsen et al. is not a relevant reference against the present claims given that Geurtsen et al. disclose the of crosslinking agent and silica, neither of which is required in the present claims. However, in light of the open language of the present claims, i.e. "comprising", the present claims are clearly open to the inclusion of additional ingredients including crosslinking agent and silica as disclosed by Geurtsen et al. Applicants also argue that Geurtsen et al. disclose three layer coating wherein the present invention achieves abrasion, resistance, hardness, flexibility, etc. in a single layer. However, it is noted that the present claims are drawn to ink not layered product. There is no requirement in the present claims disclose how many layers are present. Thus, although the ink layer of Geurtsen et al. is but one of three layers,

Art Unit: 1714

the fact remains that Geurtsen et al. (in combination with Benitez (U.S. 4,321,185)), disclose ink as presently claimed.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
